- Preloaded relaxation music lets you fall asleep peacefully
- Sleep timer for easy fall asleep to your favorite music

**PHILIPS**  
sense and simplicity

# Highlights

## Wake up to sounds of nature

Wake up to sounds of nature or radio

## Gentle Wake

Start your day right by waking up gently to a gradually escalating alarm volume. Normal alarm sounds with a preset volume are either too low to wake you up or are so uncomfortably loud that you are rudely jolted awake. Choose to wake up to your favorite music, radio station or buzzer alarm. Gentle wake's alarm volume gradually increases from subtly low to reasonably high in order to gently rouse you.

## Repeat alarm

Repeat alarm

## FM digital tuning with presets

Digital FM radio offers you additional music options to your music collection on your Philips audio system. Simply tune into the station that you want to preset, press and hold the preset button to memorize the frequency. With preset radio stations that can be stored, you can quickly access your favorite radio station without having to manually tune the frequencies each time.

## Sleep Timer

Sleep timer lets you decide how long you want to listen to music or a radio station of your choice before falling asleep. Simply set a time limit (up to 1 hour) and choose a CD or radio station to listen to while you drift off to sleep. The set will continue to play for the selected duration and then automatically switch off to a power-efficient, silent stand-by mode. Sleep Timer lets you fall asleep to your favorite CD or radio DJ without counting sheep or worrying about wasting power.

# Specifications

## Indoor Thermometer

- Temperature range: -20°C to 70 °C
- Temperature resolution: 0.1 °C

## Outdoor Thermometer

- RF transmission frequency: 433 MHz
- Temperature range: -20°C to 70 °C
- Temperature resolution: 0.1 °C
- Wireless transmission: 50 meter (Open area)

## Sound

- Output power (RMS): 200mW
